### Wake Up

We drink tonight but we don't fight  
We don't put the world to rights  
We just get even  
Work all day to get paid  
So we can do it all again  
Would you believe it - believe it  
And tonight I'll call, try to remember  
The night before it goes -  
Am I wide awake or dreaming?  
Am I busy make believing?  
Wake up, wake up, wake up  
'Cos the world keeps rolling on and on my dear  
And I'm still here  
Sunday night, but it's all right  
It's time for Saturday Night Fever  
So to the floor I'll lead her  
But now Sophie's killed the deejay  
So I guess that we all have to go home  
Nice to meet ya, but see ya -  
And tonight I'll fall, try to remember  
The night before it goes -  
'Cos when I open up my eyes I need  
To recognise the face that got me here.  
I wake up, I stand up, I'm fed up  
'Cos the world keeps rollin' on and on  
And I keep sleeping through my alarm

## Nice To Finally Meet You

Operator assistance  
Check my number's not listed  
And can you turn off my phone  
Because it's me when I listen  
No use fighting  
I've just got to take the call  
'Cos the better side of me  
Just really needs to know  
Nice to finally meet you  
Been waiting so long  
Trying so hard to reach you  
But you're never at home  
Looked in all the wrong places  
Finding all the wrong faces  
You were here now you're gone  
You're the soul I've been chasing  
Nice to finally meet you...  
It's okay if you're leaving  
I just want you to know  
That if you're down and you need me  
You can pick up the phone  
You can pick up the phone  
Nice to finally meet you  
Trying so hard to reach you

## Up In The Air

What you need is to receive  
What you're owed, but you don't know  
what to feel, it's so concealed  
But I know if I don't come down  
You won't be here  
Life's so up in the air with me  
But don't let it get you down  
You are right where I wanna be  
And together we'll figure out  
Make believe in what you see  
Bring me back  
So I won't leave  
Take your time  
'Cos I'm not dreaming  
And hold the line  
And reel me in 'cos seeing is believing  
Together we'll figure it out  
Together we'll figure it out  
And you hurt, and you hurt  
'Cause you want to believe  
And you hurt, and you hurt  
'Cause you want to believe  
Life's so up in the air with me  
But I know you'll be there for me  
Life's so up in the air with me...  
But I know you'll be there for me  
Life's so up in the air with me  
But I know you'll be there for me  
You're where I wanna be (up in the air with me)  
You're where I wanna be (up in the air with me)  
You're where I wanna be

## Your House

I was walking alone by your house  
My will was fading fast, like a sundown  
Now if only you could see  
It's just your imagination  
Then your eyes would not be burning me down  
And the things that I've done  
Yeah they're too much to mention  
But if you know that I'm ashamed  
Why don't you release the tension?  
Oh, oh  
So I turned from the road by your house  
And I, I want you to know  
That you made me want to come round, come round  
When I was staring at the beams in you house  
Flat on my back I couldn't get out  
You picked me up before I fell down  
And now I'm staring at the beams in your house  
Sometimes you know, and sometimes you don't  
And though the message is low  
Well your eyes scream way too loud, too loud  
...and I don't care on who's in and who's out  
I was staring at the beams in your house  
and I was breaking at the seams in your house  
I was staring at the beams in your house  
Flat on my back I couldn't' get out  
You sped things up before I slowed down  
My tongue was tied before I fell down...  
Have you had enough or do you want to go round?  
Go round?  
I was breaking at the seams in your house

## **Radiate**

Now if dreams were horses  
Then our wishes would ride  
But it seems mine are just stalling  
With no trail to find  
And I know, despite everything  
Well I'm on top of the world  
'Cos you're part of the beautiful things in my life  
A shooting star suspended in time  
You radiate larger than life  
And when you smile every thing's right  
There's a blind man high above us  
On a mountain we all fear  
But his cane is like a compass  
And through the clouds he appears  
And I know, despite everything I see  
Well I've no idea what it means  
And you've shown  
That your soul is your guide  
In the space where your dreams run wild  
You're a beautiful thing in my life...  
I'm walking alone  
I feel you near  
A face in the crowd  
With you in my ears  
Everything is fine  
Everything is fine  
Larger than life  
So much larger than life

## Shine

Look at the window, Sahara sand again  
Now it's travelled an ocean  
To find my window pane  
Like the day that I met you  
I was lying in the mud  
And you came to remind me  
It was time to brave the sun  
And my eyes blinded by the sand  
Your oasis in my head  
Shimmers through the glass  
And I will under paradise and cloudy skies  
See that in the rain  
Is where you shine  
And I will when my river runs dry  
See that in this pain is where you shine  
Perfect place I ran to to escape commuter trains  
Now no more chatter to Waterloo  
No more standing in the rain  
And my hands filling up with sand  
Emptying ideals, I need your looking glass  
I know if I ever find you and I  
Talking over tea  
Staring into a cupful of lies  
Now the truth is plain to see  
And wherever you are when you see my face  
In your car or window seat  
And however impossible it seems  
When you wonder if we'll meet

## Driving 40

(a Highway Patrol officer in upstate New York brought this  
Barbadian driving practice to an end after a 3 mile 'chase'...)

Driving 40 in the fast lane  
Open road and I'm feeling no pain, no pain  
Feeling no pain, no pain

## Fair Weather Friend

Say what you want, not what you need

Or you may wind up waiting on the world  
Say what you are, not what you'll be  
'Cos no-one needs some line that you've rehearsed  
And the needle's low and I'm looking for  
Some kind of gasoline  
And you're picturing your face in a magazine  
Well the dream that you want  
Well it won't mean a thing  
'Cos your fair weather friends  
Only ride when you're rolling  
Why don't you roll me one of them dreams?  
Burn brighter than a midnight sun  
'Cos the day will always end what you've begun  
And the clouds that we fear  
They don't make you run  
Because there's a hurricane out there with your name on  
And the needle's low and I'm looking for  
The storm that has to begin  
And you're sailing on with three sheets to the wind -  
Well the dream that you lost  
Well it won't mean a thing  
'Cos you'll be counting the cost  
Of your fair weather thinking  
And your friends watch you sinking  
Why don't you roll me another dream?  
Why don't you roll me another dream?

## The Bridge

Come on over  
Wait outside  
We'll go walking  
You and I  
Follow the road there  
To the other side  
Then out of nowhere  
You decide, well you decide  
That you've got to get away  
Or this all might fall apart, break in two  
And you've got to get away or the seams might fall apart  
Break  
Into the divide you would tell me to go  
Now I'm there and I find that I'm out here alone  
Here alone  
But you hesitated  
You were afraid to try  
Did I talk too fast, or not enough?  
Or not enough  
Have you had enough?  
So have you had enough?  
And you've got to get away  
Or this all might fall apart  
Break into  
And you've got to get away  
Or the seams might come apart  
Break...  
These hands aren't here to help me hold you  
This heart isn't here to help me feel for you  
And these plans we've made  
You don't have to see them through  
So you said you would try, oh how you said you would go  
Now I'm there and I find that I'm out here alone  
Maybe you'll make it  
Maybe you've made it

## No Ordinary Girl

I've found a place where we can go  
In the middle of the night  
In the comfort of your home  
'Cos you're no ordinary girl  
This is no ordinary game  
Can it be really cheating if it's only words?  
Too bad you're leaving 'cos I really have to stay  
I hope you know what you've done  
You've set in motion my love  
You'll be the reason I live  
You'll be my cyberbitch  
And when you talk to your friends  
Look you have mail again  
I'll be the scratch you can itch  
You'll be my cyberbitch  
I'll be selling it online  
Make you famous in quicktime  
Won't you see?  
Get over your fears or you won't get hurt  
So what if we live on opposite ends of the earth  
'Cos you're no ordinary girl  
This is no ordinary game  
'Cos I'm the thief and you're the pearl  
Caught on the web have you no shame?  
'Cos you're no ordinary girl  
This is no ordinary game  
Your little firewall won't stop me, no  
I'm signing in my username
